# Back With You

## Tinted Windows

Searching all over
Searching the world it's true
Turning over
Every stone for news
Just to get back
Back with youTime won't heal me
I'm trying to make due
Time won't heal me
And it won't be soon
Just to get back
Back with youAnd when you call my name
It's like a light out of the blue
And it's a game we play
Just for us, just for two
And there's a song that plays
You don't know what I've been through
What I've been throughNow that I found you
Right across the room
You walk on over
The stars come into view
Just to get back
Back with you
Just to get back
Just to get back
Back with you
Just to get back
Just to get back
Back with youAnd when you call my name
It's like a light out of the blue
And it's a game we play
Just for us, just for two
And there's a song that plays
You don't know
What I've been through
What I've been throughTo get back with you
Back with you
