

Levitation

Beach House

You and me
With our long hair on the gold one
After midnight we could feel it all
I go anywhere you want to You should see
There's a place I want to take you
When the train comes I will hold you
(When the train comes I will hold you)
'Cause you blow my mind On the bridge
Levitating 'cause we want to
When the unknown will surround you
(When the unknown will surround you)
There is no right time
There is no right time The branches of the trees
They will hang lower now
You will grow too quick
Then you will get over it The branches of the trees
They will hang lower now There's a place I want to take you
When the unknown will surround you There's a place I want to take you (for your heart)
When the unknown will looking for you
When the unknown will surround you (take my hand)
There's a ? If you go slowly There's a place I want to take you (for your heart)
When the unknown will looking for you (for your heart)
When the unknown will surround you (take my hand)
There's a ? If you go slowly There's a place I want to take you
