Without You

Social Code

I'm doing fine without you
It feels so right without you
I didn't think I'd get this far
Late night drives without you
Broken glass in my rearview
I'm driving fast and not looking backI never knew what I was missing
I always thought I'd be so lost without you
but I don't think about you
I never knew that I was missing
I never thought I'd feel so good without you
I don't care about youKarate class without you
Still kicking ass without you
Sensei says, "Catch goldfish blind"
Venice beach without you
Sandy feet in my new shoes
I'm driving fast and not looking backI never knew what I was missing
I always thought I'd be so lost without you
but I don't think about you
I never knew that I was missing
I never thought I'd feel so good without you
I don't care about you
