Summer Forgive Me

British India

Summer forgive me it was just the other day
The look on your face was a thousand miles away
It's only midnight and I'm talking to your back
I love you way too much to just give up like thatYou don't remember what I say, what I say
You're disappointed but it has to be that way
I'm gonna wait until it's only you and I
And if I get I'll deny, deny, denyPlease don't go?
You can call me anything you like
Stupid but true
I'd still do anything for youSummer forgive me
I've become the person I was meant to be
There's no one here but you and I
Summer forgive me
I refuse to become just a memory
We're gonna make it out aliveI'm always rushing and I'd never settle down
Always inventing different ways to let you down
I couldn't face you when you're looking at him too
And when it all goes wrong I'll blame it all on youPlease don't go?
You can call me anything you like
Stupid but true
I'd still do anything for youSummer forgive me
I've become the person I was meant to be
There's no one here but you and I
Summer forgive me
I refuse to become just a memory
We're gonna make it out aliveI'll always be
I'll always be that child tugging at your sleeve
I'll be on every photo that you tear in half
I'll always be that joke that used to make you laughSummer forgive me it was just the other day
The look on your face was a thousand miles away
It's after midnight and I'm looking at your back
I love you way too much to just give up like thatSummer forgive me
I've become the person I was meant to be
There's no one here but you and I
Summer forgive me
I refuse to become just a memory
We're gonna make it out alive
