Butterfly Effect

Before the Dawn

Come and shine your light upon me honey bee
And we'll take a trip to heaven exponentially
And all the world will know
And all the world will knowThere is something in your eyes I know is mine
And knowing such a thing goes up and down my spine
And all the world will knowLa la la la la la
La la la la la la
La la la la la la
baaaQuicker than the both of us it blows my mind
Like some elemental thing the universe desiresLa la la la la la la la la la la
La la la la la la la la la la la laAnd all the world will know
The world will know
The world will know
The world will know
