# Utopia

## Ruby Cube

I'm looking up above my head
Behind the trees the sky and the stars
And I see million years ahead
No planes no trains no cars
Is this a new constellation
Maybe a trick of my imagination
I see no anger
I see no pain
Just silence singing in vein

Hello bright infinite minds
Endless colorful symphonies
Goodbye bricks and deadly minds
...colors colonies
This the end of all destruction
The empty dreams and masturbation
This Is a place with all our dreams
But at least that's what it seems

Utopia
Utopia

I had it all under control
I had a body and I had a soul
Am I full of melodies
...in the trees
Well they all just have to come back
I've packed some leaf in my backpack
I ran through the corridor
Looking for the earths color tone

Oh god I should've stayed away
But now they're forcin me to stay
With their resurrection medication
Never ending superstition
My eyes shiver
I fall deeper
Until I reach out to the sky
And as I fall
Back into coma

I hear the songs in my utopia
