The Reckoning

Pillar

RideWell, I'm an outlaw taking chances When there's nothing left to gain Well, I get caught seeking answers That only cause me painCan't let my eyes get branded So I can find my way And I'll ride like a runaway bandit 'Cause I found that I'm to blameTime keeps changing But the story's the same Why do we all keep looking For somebody to blame? The score needs settled But this isn't a game So win, lose or die, we ride This is the reckoningWell, I'm a renegade living on the edge and You're the one who lives afraid I keep on turning the pages You keep on running awayWell, I'm a young gun shooting to payback Here comes the ricochet Well, I see 'Wanted, Dead Or Alive' On the page I see my faceTime keeps changing But the story's the same Why do we all keep looking For somebody to blame? The score needs settled But this isn't a game So win, lose or die, we ride This is the reckoningWhat good is the cure (What good is the cure?) Without the disease? (Without the disease) What good is the cure (What good is the cure?) Without the ride? Time keeps changing But the story's the same Why do we all keep looking For somebody to blame? The score needs settled But this isn't a game So win, lose or die, we ride This is the reckoning

I will play
