You And Me

Plain White T's

You and me, we like the same kind of music
That's why we make a good you and me
We got style, baby, we know how to use it
That's why we make a good you and meYou know what I'm going to say
Before my mouth even makes a sound
And that's why we make a good you and meYou and me, we couldn't stand being normal
That's why we make a good you and me
We both laugh at the most random situations
That's the key, baby, don't you agree?You know what I'm going to say
Before my mouth even makes a sound
And that's why we make a good you and meI know from the sound of your breathing
Exactly what you are feeling
This is why we make a good you and me
Make a good you and me, make a good you and me
You and meYou and me, all that we need is each other
That's why we make a good you and meYou know what I'm going to say
Before my mouth even makes a sound
And that's why we make a good you and meI know from the sound of your breathing
Exactly what you are feeling
This is why we make a good you and me
Make a good you and me, make a good you and me
You and me
