You And Me

Plain White T's

You and me, we like the same kind of music That's why we make a good you and me We got style, baby, we know how to use it That's why we make a good you and meYou know what I'm going to say Before my mouth even makes a sound And that's why we make a good you and meYou and me, we couldn't stand being normal That's why we make a good you and me We both laugh at the most random situations That's the key, baby, don't you agree? You know what I'm going to say Before my mouth even makes a sound And that's why we make a good you and meI know from the sound of your breathing Exactly what you are feeling This is why we make a good you and me Make a good you and me, make a good you and me You and meYou and me, all that we need is each other That's why we make a good you and meYou know what I'm going to say Before my mouth even makes a sound And that's why we make a good you and meI know from the sound of your breathing Exactly what you are feeling This is why we make a good you and me Make a good you and me, make a good you and me You and me
