

# She's Got The Answer

## Air Supply

She's the kind of girl that you need to touch  
Follow through fire  
She can take it all, always gives so much  
And laughs 'til she cries  
If she's far away I can feel her still  
Soothing my soul  
When she's here with me and I'm not myself  
She takes control  
She's got direction, she's got devotion  
She's got the rhythm, such an emotional woman  
She's got the movement  
She's got the power  
In comes the sunlight when all the flowers unfold  
I know  
She's got the answer  
She's got the answer  
She's got the answer  
She's got the answer  
I am here for you, you are near to me  
A mother or a child  
Generations passing through you  
Awake in the wild  
She's got direction, she's got devotion  
She's got the rhythm, such an emotional woman  
She's got the movement, she's got the power  
In comes the sunlight, and when all the flowers unfold  
I know  
She's got the answer  
She's got the answer  
She's got the answer  
She's got the answer  
She's got direction, she's got devotion  
She's got the rhythm, such an emotional woman  
She's got the movement, she's got the power  
In comes the sunlight and when all the flowers unfold  
She's got the answer  
She's got the answer  
She's got the answer  
She's got the answer
