

# Far from Home

Dse

La, la, la, la, na, na

La, la, la, la, na, na

Far from home

Ten thousand meters high life's not complicated

I guess I'm a lucky guy but still I find no reason

Why I feel so empty inside

I guess I'm far away from home tonight, tonight

All the places where I have been

And the rest of this world to be seen

But I feel that I'm far from home

And I want to be here on my own

All the places where I have been

And the rest of this world to be seen

But I feel that I'm far from home

And I want to be here on my own, far from home

Ten thousand meters high life's not complicated

I guess I'm a lucky guy but still I find no reason

Why I feel so empty inside

I guess I'm far away from home tonight

Why I feel so empty inside?

I guess I'm far away from home tonight, tonight

All the places where I have been

And the rest of this world to be seen

But I feel that I'm far from home

And I want to be here on my own, far from home

I guess I'm far away from home tonight, tonight
