Whither Vulcan

Remy Zero

We took you down there
To relapse in the sand
And we walked out in the open
Resolved to being seen
It was summer in the kitchen
So we stretched out in the grass
And the ones who came before us
Refused to let us pass
Vulcan rots
With liquor shots
Now he falls out
In the room
The sun breaks over us
The sun breaks over us
The sun looks over us
There's nothing to keep us tied here now
So I stayed down, where you are
And when I found you
You had learned to see it new
We went driving through the capitol
In our bathrobes and our shoes
The alarms had all gone crazy
With the hungers of the street
So we loaded up on spirits
To disfigure our defeats
Standing in line
With the science of mind
My mind was
Preparing to leap
The sun breaks over us
The sun takes over us
Every sound has its purpose in life in your hands
(The sun looks over us)
Through the wall there's another one's chance to begin
(The sun)
All the ghosts from around will return to their graves
(The sun)
From the sound of the songs that we played
(The sun looks over us)

There's nothing to keep us tied here now
