

Big Butch Bass Bull Fiddle

[Corb Lund](#)

i been playin root-five for most of the night
and most of the times, well, i don't really mind
but once in awhile i get the chance to shine
and look out, baby, when the stage is mine
the good lord knows i do the best i can
on the big, bitch, butch, bull fiddle baby here i am got the black horsehair on my big bass bow
a little meaner than the sorrel that was on it before
sawin back and forth to meet the big bass drum
and pretty soon you can hear the rhythm section humi gotta buy an extra seat when i ride the airplane
or the womens and the childrens and the pilot complain
cuz it sure dont fit in the overhead bin
and leavin her behind is basically a sin yes, leavin her behind might save a little space
and i ain't no slouch on the electrical bass
but somethin kinda happens when the f-holes sing
with the snappin and the poppin of the flat wound strings
