

Chester's Farm

Big Country

Black cars come and black cars go
full of secrets you will never know
tyres hiss in the rain be feels through the night?
shadows move behind the glass, no one worries no one asks
politicians come and go so fast...I don't mean to do no harm I don't wanna cause alarm
I try to be cool I try to stay calm
but something weird's going on at Chesters Farm...This is the place where the monkeys die
this is the cage where the mutants fly
on the wings of an industry funded research lie
and this is where the tests are made
where our finest minds parade
upon the plan of bones that they have laid...I don't mean to do no harm I don't wanna cause alarm
I try to be cool I try to stay calm
but something weird's going on at Chesters Farm...I don't mean to do no harm I don't wanna cause alarm
I try to be cool I try to stay calm
but something weird's going on at Chesters Farm...Something back and the bugs gone wild
the biological demon child
is alive and among us resistance is futile...I don't mean to do no harm I don't wanna cause alarm
I try to be cool I try to stay calm
but something weird's going on at Chesters Farm...I don't mean to do no harm I don't wanna cause alarm
I try to be cool I try to stay calm
but something weird's going on at Chesters Farm...
