

Maybe Something's Wrong With Me

Echo Movement

Thoughts pour from my head
I hear the people laugh at what I said
And if I follow who's ahead
I won't feel lost, but purposely misled

Maybe something's wrong with me
When the world looks upside-down
But my feet are on the ground
Maybe something's wrong with me

Hear the evening news
Another scandal proves we've been abused
Talking heads confuse
So casually push me on their views

Maybe something's wrong with me
You're staring like I'm crazy
I look back like I might be
Maybe something's wrong with me

Look around my world
Oh what a mess into we've all been heard
And every time I find my logic fail
I'll blame it on my mind
