

Disgrace

Waterdown

The noblest ideas
Might turn into a farce
Make sure you do not
Lose them all Your pace is growing slower
Now it would not cross your mind to riot
And to forget about your safety
Break in and turn on all the lights Do you really want to sleep
Do you really want to forget
Do you really want to sleep
Do you really want to forget All meanings worn thin
We're lost in disgrace
You took that poison easily We've done an inch from nothing
Now we all agree on what is real
For the sake of our convenience
No longer standing now we kneel Do you really want to sleep
Do you really want to forget
Do you really want to sleep
Do you really want to forget Why don't you get out before you're dead
Why don't you get out
Why don't you get out before you're dead
Dead Why don't you get out before you're dead
Why don't you get out
Why don't you get out before you're dead
Try to get out Do you really want to sleep
Do you really want to forget
Do you really want to
Do you really want to forget Do you really want
Do you really want to forget
Do you really want
Do you really want to forget
