

# Broken Promises

## Survivor

Girl, is there something in the night  
That draws us together  
Are these moments worth the fight?  
Why must we keep it to ourselves The secret we hold inside  
Let me take you in my arms  
With the strength of a love that's denied  
And we've always believed in our heart That the chances we've missed  
Still exist in the world after dark  
Backstreet love affair  
Running through the heart of the night Backstreet love affair  
Girl, there's a tension I can taste  
That speaks for the danger  
Let the warnings go to waste Eyes that reflect a secret fire  
That covers the fear inside  
In a flash we're lost from sight  
To explore the romance that we hide And the thrill of the chase plays a part  
In the chances we take  
We escape to the world after dark  
Backstreet love affair Running through the heart of the night  
Backstreet love affair  
Meet me in the city tonight Backstreet love affair  
Running through the heart of the night  
Backstreet love affair
