First Time

Icona Pop

[Icona Pop]
I just can't stop thinking about you
Rewind the time before I lost my mind
There were something special but us
Remember when we thought it'll never endCome on and run, run, run with me through the LA
Before we get older
And all our friends start to burningThe first time we got high
The first time we got drunk
The first time we fell in love
This will never be the same
And that's okI'll never forget about you
Rewind the time before I lost my mind
(I think I lost my mind)
There were something special but us
Remember when we thought it'll never endCome on and run, run, run with me through the LA
Before we get older
And all our friends start to burningThe first time we got high
The first time we got drunk
The first time we fell in love
This will never be the same
And that's ok
That's okLet's go to Paris
Let's runaway
To all the things that we used to sayLet's go to Paris
Let's runaway
To all the things that we used to sayThe first time we got high
The first time we got drunk
The first time we fell in love
This will never be the same
The first time we got high
The first time we got drunk
The first time we fell in love
This will never be the same
And that's ok
