

Shine in the Light

[Anna Rossinelli](#)

You had a picture on the wall
Showing you the one
The one you always idolized
And when you struggled on your way
You looked up again
To the shape of your future life
Sometimes seconds turn to hours
Hours turn to seconds
But each moment was a step ahead
Until the day will come
They put up on a wall
A picture signed with your nameHush... hush... adrenalin rush
Before you're steppin' out of the darkWhen the light goes on and on and on
You make them sing along, come on, come on
You're on top of the world tonight
So shine in the light, shine in the light
Now you're on and on and on
You make them sing along, come on, come on
You've been waiting all your life
To shine in the light, shine in the light nowAnd when you take a look behind
Turning back the time
You remember all the trouble it takes
To know what to choose
To win and to lose
To get up on your feet if you fail
Sometimes seconds turn to hours
Hours turn to seconds
But each moment was a step aheadHush... hush... adrenalin rushWhen the light goes on and on and on
You make them sing along, come on, come on
You're on top of the world tonight
So shine in the light, shine in the light
Now you're on and on and on
You make them sing along, come on, come on
You've been waiting all your life
To shine in the light, shine nowOn the horizon line
A sparkle begins to shine
It makes me feel alive... tonightOn and on and on....When the light goes on and on and on
You make them sing along, come on, come on
You're on top of the world tonight

So shine in the light, shine in the light
Now you're on and on and on
You make them sing along, come on, come on
You've been waiting all your life
To shine in the light, shine in the light now
