Girls And Boys In School

Neon Trees

Play me down my lover
Like we're undercover
Like we're in a fresh veneer
Like all the girls and boys in schoolOur anticipation
And our bad behaving
It's like we learned our lesson
But conveniently forgot the rulesQuestions for questions, I've got a question
Would you ever dance with me like that?
Questions for questions, I've got a question
Would you ever dance with me like that?I don't want your lover
Like my younger brother
He's patronized another
But I think it's serious this timeI don't want you fading
Acting like you hate me
It's just like all your paper cuts
They cut you in the coldest spotsQuestions for questions, I've got a question
Would you ever dance with me like that?
Questions for questions, I've got a question
Would you ever dance with me like that?Fuck all the rest and forget the rules
Like all the girls and boys in my school
Questions for questions, I've got a question
Would you ever dance with me like that?I said to this end, don't hurt your best friend
I said to this end, don't hurt your best friend
I said to this end, don't hurt your best friend
I said to this end, don't hurt your best friendQuestions for questions, I've got a question
Would you ever dance with me like that?
Questions for questions, I've got a question
Would you ever dance with me like that?Fuck all the rest and forget the rules
Like all the girls and boys in my school
Questions for questions, I've got a question
Would you ever dance with me like that?Would you ever, would you ever
Would you ever, would you ever
Keep playing along again?
