Blue

Danny Saucedo

You stroke me down like no-one else before
That time I saw you girl across the floor
Just one look was all it took
Since then I've been so dawnBut baby do you wanna be with meEverything you do
Everything is blue
Everytime we touch
Can you feel the rush
We're never alone
Get into the zone
Where everything you do
Paints my love in blueBorn into a world that never sleeps at night
Put a side the thorns, the troubles on your mind
And through the fog we meet each other on the other side
And when you're here with me
Then blue is all we seeBut baby do you wanna be with meEverything you do
Everything is blue
Everytime we touch
Can you feel the rush
We're never alone
Get into the zone
Where everything you do
Paints my love in blueI wanna feel your body close to mine
I wanna scream your name out through the nightEverything you do
Everything is blue
Everytime we touch
Can you feel the rush
We're never alone
Get into the zone
Where everything you do
Paints my love in blueEverything you do
Everything is blue
Everytime we touch
Can you feel the rush
We're never alone
Get into the zone
Where everything you do
Paints my love in blueEverything is blue
