

# Outrage

## Sister Sin

Cool calm and all collected  
Try hide that hate from here  
Let go pass by unaffected

For what reason you choose to never exposeResolute in denying emotions

It's there weather like it or not

Lash out hun, make it atrocious

One shot, show for what you lack

Spill your guts now, don't hold it back

C'mon, bring it on and let me feel it

I want that teenage rampage, mayhem and outrage

C'mon, scream it out till I believe it

We need that front page outrage, alright

Make it bleed between the linesCold, cold calm and disconnected

Fine line between heaven and hell

Today determines tomorrow

Ya all get just what I say we saidLet go give in to the moment

Lash out in a violent display

My time, your time to go when

Rise up, show for what you got

Ready to burn then rip it out

C'mon, bring it on and let me feel it

I want that teenage rampage, mayhem and outrage

C'mon, scream it out till I believe it

We need that front page outrage alright

Make it bleed between the lines
