

# She Builds Quick Machines

## Velvet Revolver

Hold fast, motor off, come strong, let it roll  
Ice cold desert stone, she build a quick train  
Seems to keep the motor clean so this is kind of weapon sheen  
She's always quick to find, oh, breaking through tonight  
I can feel the way you're pushing down  
I can feel the way they stood their ground  
Roll over, right, keep it through the night, right, right  
Keep it through the night  
Right in my sight, keep it through the night  
I'll smash right through your spotlight  
She ran away to Texas to keep away the excess  
Oh, vexed and beggin' stroke back Texas  
She burnt through inheritance just to cross America  
At the all night sex show so far from home  
I can feel the way you're pushing down  
I can feel the way they stood their ground  
Roll over, right, keep it through the night, right, right  
Keep it through the night  
Right in my sight, keep it through the night  
I'll smash right through your spotlight  
What you give is what you take  
What you bleed is what you break  
I bleed for you, I'd steal for you  
I'd take, I'd take, I'd take, I'd take  
I'd take, I'd take, I'd take, I'd take  
I can feel the way you're pushing down  
I can feel the way they stood their ground  
Roll over, right, keep it through the night, right, right  
Keep it through the night  
Right in my sight, keep it through the night  
I'll smash right through your spotlight
