

Talk to Me

Kiss

When I see you girl, you turn my head
You make me dizzy, I get a good vibration
When I look into your big blue eyes
I start to quiver and shake, I get a strange sensation
When you walk by me you strut around
You make me crazy, I get no relaxation
Talk to me, talk to me
All I want is a little conversation
Talk to me, talk to me
All I want is a little conversation, talk to me
People tell me that you run around and that you're no good
You got a bad reputation
I don't care what all the people say, you know they talk too much
It's a fascination
All I wanna do is talk to you and maybe go out
And form some kind of relation
So, talk to me, talk to me
All I want is a little conversation
Talk to me, talk to me
All I want is a little conversation
Talk to me, talk to me, talk to me, talk to me
Why don't you talk to me?
Come on and talk to me
I just wanna talk to you
Girl, I wish you knew the way I felt
You think I'm silly, that it's infatuation
So we better get together soon because I need you girl
I can't stand the frustration
So, talk to me, talk to me
All I want is a little conversation
Talk to me, talk to me
All I want is a little conversation
Talk to me, talk to me
All I want is a little conversation
Talk to me, talk to me, talk to me, talk to me
Why don't you talk to me?
Come on and talk to me
Talk to me, talk to me, talk to me
(I just wanna talk to you)
Talk to me, talk to me, talk to me
(I just wanna talk to you)
Talk to me, talk to me, talk to me
(I just wanna talk to you)
Talk to me, talk to me, talk to me
(I just wanna talk to you)

Talk to me, talk to me, talk to me
