

# Say What?

## Madball

Say what you want to say, the same old thing  
Say what you want to play, the same old game  
Say what you want to say, I won't change  
Say what you want to say, just look my way What you see is what you get  
This is who I am, nothing less  
You think you're better but you bleed red like the rest  
But are you willing to, now that's the real test Who you know, where you're from, what you've done  
In my eyes none of that matters  
Staying true to yourself, what we strive for  
Staying true to yourself, now who's hardcore? Say what you want to say, the same old thing  
Say what you want to play, the same old game I say it now, I said it then  
For all those who always try to offend  
You paint a picture and you still don't comprehend  
One thing about me 'coz you ain't my friend Who you know, where you're from, what you've done  
In my eyes none of that matters  
Staying true to yourself, what we strive for  
Staying true to yourself, now who's hardcore?
