Descending

Rusty

In Hab town blows me away
I never thought that I'd ever see your face
It was strange and kinda good
Being back in your neighbourhood
If there's problems I will solve them
Please don't run away
If there is a problem you can hide today
We talk awhile I'm feeling loose
Should have stopped, but the beer is flowing good
You were here and now your gone
Think of you when the miles role along
If there's a problem I will solve them
Please don't run away
If there's a problem you can hide today
