## Albertucho

You got the first mile  
Made it through but you're falling apart  
Forget the distance that you've moved  
Since you were at the start I bet you would do much better  
Doing what you feel in your parts Because you give and take  
And give all that you've got  
And it starts to break you down  
Until you have broken I've got a bucket of water in case you catch on fire  
I'm at the pit stop waiting for you  
If you blowout or tire I've gotta tell you  
You fight like a bull and that I truly admire That you give and take  
And give all that you've got  
And it starts to break you down  
Until you have broken down No flag in sight yet but you've gotta keep moving  
If your wheels forsake you, it'll surely break you  
In time you'll be sold, you might feel cold  
But don't forget that it's the path you've chosen
