

# No Control

## Brand New

In the end, we weren't much  
With the hollow space  
Shrank down inside of all of us  
For the good  
Of all man  
Hold me down  
Underwater and don't let me up again  
No control  
No control  
No control  
Be for someone else  
Love is in your actions  
I got a job  
So let me find 10 million distractions  
Some get sick  
Some don't get cured  
That's how it goes  
But the worst is over  
Chum and throw me overboard  
No control (I thought I knew the way out but then)  
No control (It started over again)  
No control (I hear your voice coming through the grate)  
No controlHolding the mic to this pillar of salt  
She won't see anything at all  
Kiss me once on each eyelid  
So I can see how I dreamed it  
No control  
No control  
No control  
No control  
No control (I thought I knew the way out but then)  
No control (It started over again)  
No control (I hear your voice coming through the grate)  
No control
