When Everything Was Alright

Sam Roberts

There goes my mind there goes my mind
And it's the same mistake I've made so many times
That my own mother think I'm blind
You can't be true, you can't be true
And I'm spending all my money
Making sure that things are going right for you
Starting it over to a time when everything was alright
When everything was alright to the time
When everything was alright to the time
When everything was alright
You got no love, you got no love
And don't come crying home girl
When you realize you ain't got no love
I'm coming down, I'm coming down
And I'm paranoid of everything
Yeah girl you got me living underground
(Yeah you know what I'm talking about)
Starting it over back then when everything was alright
When everything was alright to the time
When everything was alright to the time
When everything was alright
When jaundice went away in 1997
They said your liver's fine now
But you're never goin' to heaven
'Cause of what you've done
'Cause of what you've done
I said listen son It's 'cause of what you've done
Starting it over back then when everything was alright
Yeah everything was alright, everything was alright to the time
When everything was alright to the time
When everything was alright to the time
When everything was alright
