It Was Summer... (Baby Steps)

October Fall

And it was summer, don't hide your sunburn
Wear that shirt that cuts so low
I know you loved her but couldn't trust her
So let's take this extra slowSleeping in and wouldn't go, we're near the weekend
Waking up inside a basement with my best friends
And we changed our dreams to nine to five
But when the sun goes down is when you felt aliveYou say you'd never let this go
I say we forget what we know
Keep taking baby steps
We're still so far aheadIn summer heat we lose our clothes
And it won't hurt what they don't know
Keep taking baby steps
'Cause you're so far, so far aheadSummer secrets keep me breathing
My old routine stopped repeating
And I'll never forget anything that happened today
The days go by but we don't changeDear summer, I won't forget you
Walk away but I won't let you
And I'll never forget anything that happened today
The days go by but we don't changeYou say you'd never let this go
I say we forget what we know
Keep taking baby steps
We're still so far aheadIn summer heat we lose our clothes
And it won't hurt what they don't know
Keep taking baby steps
'Cause you're so far, so far aheadAnd here's the best part, it's got the best start
No one saw this coming from a mile away
So unexpected, I know you meant it
If I can't have you I'll dream about youSo I'll be sleeping because this dreaming
Is as close as I can get to getting close to you
So close my eyes, don't wake me up
Keep taking baby steps, keep taking baby steps
Keep taking baby steps, keep taking baby stepsYou say you never let this go
I say we forget what we know
Keep taking baby steps
We're still so far aheadIn summer heat we lose our clothes
And it won't hurt what they don't know
Keep taking baby steps
'Cause you're so far, so far aheadDear summer, I won't forget you
I won't forget you

So don't forget me tooIt's gonna be summer for the next twenty years bro
I'm really drunk
