Canyon

Black Gold

Our life on this hill run
So slow to begin
Flowers bloom till the end
All wounds mend themselvesTheyll tear us apart
If we dont hang on
Their watching us now
Will we come undoneLift up your hand and dry your eye
Tell me its all over now
And we said our last goodbyes to everyone
Say that you will, tell me its realThis canyon between us
One push into dust
All on with such pretty things
She walks by herselfThey tear us apart
But we all hang on
Their watching us now
Will we come undoneLift up your hand and dry your eye
And tell me its all over now
And we said our last goodbyes to everyone
Say that you will, and tell me its realHis blood, he will give to you
Strong heart is the best he can do
When its all said and done
Will you go on and run
Their watching you now
Will you come undoneLift up your hand and dry your eye
And tell me its all over now
And we said our last goodbyes to everyone
Say that you will tell me its real
