Activate

A Telemetry

can we find the role
so much to take a toll
we close the door
lost in fog - you can't explore

is something missing
is there nothing more
do you act on impulse
or do you hit the floor

what drives us
what keeps us alive

activated
the inner voice calling out to you
captivated
the insecure mostly over used
isolated
the fence around built to ease the time
activated - activate to find

can we all debate
so much can be fate
we rely on hope
and find we missed the boat

is something hiding
is there nothing shown
do you learn the hardway
are your circuits blown

what rides us
what will make us strive

activated
the inner voice calling out to you
captivated
the insecure mostly over used
isolated
the fence around built to ease the time

activated - activate to find

a constant hill to climb
you're dragged behind
the emptiness a clue
as faith unglues

activated
the inner voice calling out to you
captivated
the insecure mostly over used
isolated
the fence around built to ease the time
activated - activate to find
