I Hear You Calling

Gob

I've seen you now about the fourth time baby
But you know that I got nothing to say
It's so charming to look on your face

But your eyes inviting something I just can't do nowI've been around about your hood I'm looking for you just to shine some light on my day

Feels like ages since I've been out your way
I've been caught up with a handful of new sensationsI hear you calling
Calling for me out in the night

But it's all bad

And I know thatI've seen you now about the fifth time baby
But you know I got nothing to say
It's so charming to look on your face

But your eyes inviting something I just can't do nowI've been around about your hood I'm looking for you just to shine some light on my day

Feels like ages since I've been out your way
I've been caught up with a handful of new sensationsI hear you calling
Calling for me out in the night
But it's all bad

And I know that
