

# Change the Station

## A Telemetry

trick be with you  
hollow is their name  
stick it to you really good  
rejected insult  
glues you to a scene  
such a narrow minded scheme  
and you never notice  
the effect it gives  
but you sit there zombied  
with a head full of space

just change the station  
don't let them jam this down your throat  
just change the station  
that's the answer let them grope

a fancy hypocrite  
lured to a cause  
just to line his pocket  
indulgent reflex  
caters to his gain  
such a shadow of strain

and you search for something  
to release the stress  
but you find a tap out  
and a face without a trace

just change the station  
don't let them jam this down your throat  
just change the station  
that's the answer let them grope

in a search for truth  
the need for honor  
only found deception lies  
left to lose my way today  
no more rules one big fool got fried

just change the station

don't let them jam this down your throat  
just change the station  
that's the answer let them grope
