Road Rash

Mad Caddies

it's a nice day for a drive
automotivation
the air is getting clear and
the time is getting near
for us to roll
gotta watch my style
cause god it's almost over
got a little more room
to try it hopefully
I've walked this earth for twenty years and
now my mind is floating...
out to sea
gonna hit the van man
you just don't understand
total aggravation
rolling down the highway
doing ninety going my way
in control
gotta watch those corners
in the stretch of danger
a problem could arise eventually
I've walked this earth for twenty years and
now my mind is
floating.... out to sea
every time I look into the north wind
I can't find meaning just a rhyme
I don't know but I've been told
that good things come with time...
Let's go!
