Family Friend

The Vaccines

They've all got their opinions but then what do they know
If you can't go back, where the hell do you go?
Does everybody really feel as high as a kite?
Well I don't really know if they do but they might
You wanna get young but you're just getting older
And you had a fun summer but it's suddenly colder
If you want a bit of love put your head on my shoulder
It's cool
They've all got their opinions but then what do they know
If you can't go back, where the hell do you go?
Does everybody really feel as high as a kite?
Well I don't really know if they do but they might
You wanna get young but you're just getting older
And you had a fun summer but it's suddenly colder
If you want a bit of love put your head on my shoulder
It's cool

You wanna get young but you're just getting older
And you had a fun summer but it's suddenly colder
If you want a bit of love put your head on my shoulder
It's cool
Half baked girl
Hey, I'm hardly surprised
Snake eyes disguise everybody's lies
Faded nail marks on pale thighs and an awkward secret that someone denies
And now you're trying to get yourself back in
Come on in
You wanna get young but you're just getting older
And you had a fun summer but it's suddenly colder
If you want a bit of love put your head on my shoulder
It's cool
You wanna get young but you're just getting older
And you had a fun summer but it's suddenly colder
If you want a bit of love put your head on my shoulder
It's cool
