Never Alone

Shoreline

Madison was a friend of mine
She was never late
And showed up on time

Everyday went her way
She always knew what to say

Then one day
She had enough
She decided to give up

Remember that you're never alone
You never know what you got until it's gone
The memories begin to fade
The future has already been made

How did she get so lonely
Everyone thought she was funny
You never know what lies behind
You can never find
Never know what you got
And it turned out to be great

Remember that you're never alone
You never know what you got until it's gone
The memories begin to fade
The future has already been made

Did you ever say sorry
Did you even think of it?
Life is all fun and games
Until someone gets blamed

Remember that you're never alone
You never know what you got until it's gone
The memories begin to fade
The future has already been made
