For Your Love

Marching Band

We got a long way to go
We got a long way to go til midnight
This year we capture the feel
Our days get longer in the summer

Boredom is very real
Boredom is killing
We got a long way to go
We got a long way to go til midnight

For your love
For your love
For your love
For your love

Nothing is right when you're on your own
1995, the year that I choose to be married
Say it's alright
A long way from home
Just one more time
Promise I don't need to worry

You know the monsters and all
You know the monsters are hunting sunrise
They're bellies cracking as they fall
I fill them up with rock and boulders
Nothing more frightens me
Nothing is scary
You know the monsters and all
You know the monsters'll hunt til sunrise

For your love
For your love
For your love
For your love

Let it go
Let it go
Let it go
I'm just a little

Let it go
95
The year I chose to
You know you want to
You know you have to

Nothing is right when you're on you own
1995, the year that I choose to be married
Say it's alright
A long way from home
Just one more time
Promise I don't need to worry

Nothing is right when you're on you own
1995, the year that I choose to be married
Say it's alright
A long way from home
Just one more time
Promise I don't need to worry
