Taste It

Jake Bugg

Fill my head with the future
Fill my eyes with the sky
Whole of my life I've been left behind but I've never felt more alive
High speed conversations
Speeding on down the line
Looked in your eyes said the saddest goodbye but I've never felt more aliveI can taste it
In my mouth it's just so bitter sweet
it's right there in your eyes of apple green
It should be easy but it's hard to leaveWent down in a fiery Zeppelin
You won't know if you don't try
Nothing but my shirt and I walked away hurt but I've never felt more aliveTalking on a bad connection
Think I might have fused a wire
Your on the other side as I've always sussed out but I've never felt more aliveI can taste it
In my mouth it's just so bittersweet
It's right there in your eyes of apple green
It should be easy but it's hard to leaveYeah and this road between us
Man it's been a long hard drive
You pay for it in the morning when your best friend is deniedFlying all around never looking down no I've never felt more alive
Journeys going fast I hope it's gonna last 'cause I've never felt more alive OhI can taste it
In my mouth it's just so bittersweet
It's right there in your eyes of apple green
It should be easy but it's hard to leave
