

If You Can Make It Through the Rain

The Naked Brothers Band

You can make it through the rain
You can make it through the sun
So hold on, we'll see what happens to you and me
We'll see what happens to you and me Well there will be some tough times
And some rain, and some bleeding
There will be some pain
I will admit there will be some agony If you can make it through the rain
You can make it through the sun
So hold on, we'll see what happens to you and me
We'll see what happens to you and me There will be some horror
And some blood, and some death
Some nights of sorrow
It's true but what about the sun? If you can make it through the rain
Then you can make it through the sun
So hold on, we'll see what happens to you and me
We'll see what happens to you and me If you can make it through the rain
You can make it through the sun
So hold on, we'll see what happens to you and me
So hold on, hold on, happens to you and me Hold on, we'll see what happens to you and me
So hold on, we'll see what happens to you and me
