

Midnight Ride

August Moon

Ride with the night, shoot for the stars
Stop for the red light who do you think you are?
We'll try to blast through the trigger, channel that fire
Burn baby burn as the heat blaze the tires
Now breathe the fumes of exhaust, you think I'm tired?
I can drive all night, I'll show you what's under the cover
Try to push it to the limit, climbing higher in the digits
There 'aint nobody that can stop us, we'll explore your favorite places
We'll drive all night long
Chorus:
Let's go baby
I can take you for a joy ride, watch the mileage meter rise
Are you ready?
I can show you every way I can cruise and it goes something like this
Let me take you on the open road, teach you some tricks that go something like this
Midnight ride, calm of the night
Shake it all up as we fly on by
We'll try to chase the rush, reach that high
Roll the windows now watch the sparks ignite
Addicted to the thrills, accelerate the breath
As we shift in gears from one to the next
Try to push it to the limit, climbing higher in the digits
There 'aint nobody that can stop us, we'll explore your favorite places
We'll drive all night long
Chorus
