

Earthquake

[Sandi Thom](#)

How could I know what was coming my way
cause you didn't warn me at all
Then suddenly out of the blue you say
well I just don't love you no more They say a moment can change your life
Aint that the truth
I've weathered some pretty big storms in my time
but baby this one cut right through So this is what it feels like
when your heart breaks
this is what it feels like
when the ground shakes
this is what it feels like feels like Like an earthquake
When the ground shakes
and your heart breaks into 1000 pieces
and you say the words
and my whole world suddenly changed like an earthquake There's no way of knowing there's no warning signs
when everything comes crashing down
Well I hope you know what it feels like someday
when somebody turns your world upside down You know this is what it feels like when your heart breaks
this is what it feels like
when the ground shakes
this is what it feels like Chorus Bridge - You shook my foundations
tested the strength of my heart
but I won't be shaken
no I won't let you tear me apart From the earthquake
when the ground shakes
and my heart breaks
into 1000 pieces
and you say the words and my whole world suddenly changed Chorus
