

# Buffalo

## Nudeswirl

Buffalo

you sacrafice all the things and you wont care  
sit them out on the edge of the river  
dig dig dig in this brutal world  
exactly what are you waiting for

Christmas comes but it wont come again  
then you watch the days go by right outside the window is freeking me out  
can not believe the Buffalo

right outside the window is freeking me out  
can not believe the Buffalo

safe to say one more time and lallaby we all back away she rolls  
dig the life that I got I dig this homicide but he sets back for the taste of the lies

right outside the window is freeking me out  
can not believe the Buffalo

right outside the window is freeking me out  
can not believe the Buffalo

bow at the tide will angels homicide we all back away she rides  
die like hell but you know you should care but he sets back for the taste of the lies

right outside the window is freeking me out  
can not believe the Buffalo

right outside the window is freeking me out  
can not believe the Buffalo

I swear to say say say

I swear to say say say
