

Chance Of A Lifetime

Mest

The end of the world's in front of me
Hard to believe all I see
It comes so close but pulls away
To let me stay another day
It's one chance in your lifetime
But it won't be the last time
It seems, there's always the next hill to climb
And you know there's a lifetime
The things that I see, never end
Trickin' my mind to just pretend
I understand what's happening
When other's doubt, you still believe
It's one chance in your lifetime
But it won't be the last time

I swear there's always the next hill to climb
And you know there's a lifetime
Changing what I once thought
Letting go of what I once fought
There's a life that you need to find
All that surfaced has changed my mind
The end of the world's in front of me
Hard to believe all I've seen
It's one chance in your lifetime
But it won't be the last time
I swear, there's always the next hill to climb
And you know there's a lifetime
