

Police Me

The Sugargliders

Police yourself, police yourself, police me
Police yourself, police yourself, police me
We've got your own remote viewing
Every cell has been taught to think
Perhaps the answer to the question lies in the question
Perhaps you should read my thoughts, line them up like soldiers
Police yourself, police yourself, police me
Loaded full of winter, you are storming
Blackberry girl will you strike before he's
Loaded full of winter, you are storming
Blackberry girl will you strike before he's
Loaded full of winter, you are storming
Blackberry girl will you strike before he's
Loaded full of winter, you are
Police yourself, police yourself, police me
Police yourself
(Can they monitor how you think?)
Police yourself
(They've got their own remote viewing)
Police yourself
(To get off he cries slutty goth)
Police yourself
(But I'm a brightly colored person)
Police me
Loaded full of winter, you are storming
Blackberry girl will you strike before he's
Loaded full of winter, you are storming
Blackberry girl will you strike before he's
Loaded full of winter, you are storming
Blackberry girl will you strike before he's
Loaded full of winter, you are
Perhaps the answer to the question lies in the question
Perhaps you should read my thoughts, line them up like soldiers
Perhaps the answer to the question lies in the question
Perhaps you should read my thoughts, line them up like soldiers
Police yourself, police yourself, police me
Police yourself, police yourself, police me
