The Night Was Burning The Ground Was Frozen

Inca Babies

And i met her in the clearing
and i said we shouldn't do this
and i said it wasn't fitting
That we'd hit it for so long
In our hearts we knew the danger that
Will have no ending
And all our disires were caught right here in the clearing

And i hear there's a train
And it rolls on and on
to the midnight pole where we might be safe

And i suggest we take it soon
And never come back
Yea it's time we took off
We're gonna sleep on the mountain

[Chorus]
The night was burning
And the ground there was frozen
Seemed to me like the icicle's falling
This night it bits like a serpent
Like a wrath
And clear is the heart of a stolen diamond

How long has it been that we know
He's kill us
And you know he'll kill your brother
And you know he'll kill the dogs
And he'll burn down the house
And the forest and the mountain
So you still wanna tell him
Face to face
Eye to eye

[Chorus]
I hear a noise like the judgment train
I hear the noise like the mountains falling in
The night is burning
And the ground is frozen

Looks like we picked a good night to
die...

I know we're trapped in the attic
And he's breaking down the door
How long will it last before he breaks us
Down below
The smell of forest fire and the smoke on the mountain
The cold night can save us
So kiss me one more time

[Chorus]
