Damn the Machine

Gamma Ray

Damn the machine
Drilling in the center of my mind
One evil dream
The annihilation of mankindThe stern-faced leaders
In their temple of doom
Creating nightmares
Made for me and for youDamn the machine
The enemy is stalking in the void
One evil dream
The engine's running faster to destroyHere come the raiders
They're invading us all
We stand in silence
With our backs to the wallOnce I believed in the voice of a god
The god of creation is goneA call from the heart to the god of love
Send us an angel, a sign from above
All of the damned and a silent scream
Save us and damn the machineThe curse, foretold in prophecies
Is haunting us now
The world, a creeping agony
And there's no way outCaught in illusions, I'm screaming in pain
The demon's corroding my brainA call from the heart to the god of love
Send us an angel, a sign from above
All of the damned and a silent scream
Save us and damn the machineA call from the heart to the god of love
Send us an angel, a sign from above
All of the damned and a silent scream
Save us and damnA call from the heart to the god of love
Send us an angel, a sign from above
All of the damned and a silent scream
Save us and damn the machineDamn the machine
Damn
Damn the machine
