

# Jupiter's Child

## Steppenwolf

The one who reads the stars has told me  
Why you're not like everyone  
Your father is a fiery wizard  
He travels all around the sun Nobody ever knew where you came from  
Orphan girl, you grew up wild  
Your father left you on the way home  
Yes, girl, you're a Jupiter's child Wish, I knew the way back  
Back to where you came  
Gladly I would leave here  
Take another name I can tell by you, it must be true  
It's up on Jupiter's face  
They don't embrace her own disgrace  
Somebody, help me off this place You never really quite belonged  
Like a pearl among the swine  
You tried to live the way we do  
Hoping you would learn in time But, mankind, with all it's virtue  
Will soon make you lose your smile  
On this earth, with all it's madness  
Heaven help a Jupiter's child Wish, I knew the way back  
Back to where you came  
Gladly I would leave here  
Take another name I can tell by you, it must be true  
It's up on Jupiter's face  
They don't embrace our own disgrace  
Somebody, get me off this place
