

Geometry &C

Chris Walla

It used to bother me, all the shapes I can't describe
How we all fit together like wordless versing
And da-dee-dum-dum, da-dee-dum-dum, da-dee-dum
I was there, I saw you searching the corners for your light
But it's not there, it was never there

In files and books, a void of there in your heart fails your mind This is the geometry, this is the life of you and I

How we fall for a second together and down we're singing
Da-dee-dum-dum, da-dee-dum-dum, da-dee-dum

It's a college, a connection and made to find the light
And it's brighter than we remember it being the last time we tried, we tried You don't need to speak just now
You should keep it down and let that ticker pound Let your heart keep the time

Keep the time, keep the time
The loudest part is in control, whoa Let your heart keep the time
Keep the time, keep the time
The hardest part is letting go, whoa Let your heart keep the time
Yeah whoa, yeah whoa Let your heart keep the time
Keep the time, keep the time
The loudest part is in control, whoa Let your heart keep the time
Keep the time, keep the time
The hardest part is letting go, whoa
Let your heart keep the time
