Backlash

Front Line Assembly

Breaking, all these rules you made for me
Running, through these mine fields set for me
Burning, in the fire you fueled for me
Laughing at the anger you've thrown my wayI know what's real, I want to feel
the full effect
These open wounds, will never heal
there's no respectI know what's real, I want to feel
the full effect
these open wounds, will never heal
there's no respect(Backlash)The anger, will fuel the fire
The anger, the flames get higherBreaking, all these rules you made for me
Running, through these mine fields set for meI know what's, real I want to feel
the full effect
These open wounds, will never heal
there's no respectI know what's real, I want to feel
the full effect
These open wounds, will never heal
there's no respectThe full effect
There's no respectI know what's real, I want to feel
the full effect
These open wounds, will never heal
there's no respect
